Aria Soha
Facility Manager/Coordinator
Fermilab Test Beam Facility
Fermi National Accelerator Laboratory
PO Box 500
Batavia, IL 60510

Dear Aria,

This is a quick note to thank you for all the support we received from you and your group for test experiment T1042, muon g-2 straw tracker, that took beam from January 22 to February 4, 2014. We had a run that was very successful in no short part because of the quality of the supporting infrastructure at the facility and the ingenuity and helpfulness of the support group, Todd, JJ, Ewa, and Geoff. In particular, we are grateful for all the help we received from Geoff Savage during the run and in the weeks leading up to the run with software and computing. Most importantly, we received an enormous amount of help from Todd Nebel on our setup days. There were times when we made requests of him towards the end of his work day and he didn't hesitate to take them on and complete them even when it meant staying late on an already long day.

Please accept these pictures from T1042 and the muon g-2 collaboration as a token of our gratitude. We look forward to working with you in the future both at the test beam and on the muon g-2 experiment.

Best regards,

A handwritten signature in blue ink, appearing to read "B. Casey", with a long vertical line extending downwards from the end of the signature.
